THE MOST CLOSELY READ WEEKLY NEWSPAPER IN ALAMEDA COUNTY

VOLUME NINETEEN — NILES, ALAMEDA COUNTY, CALIFORNIA, THURSDAY, JULY 14, 1927. — NUMBER 16.

NILES BASEBALL TEAM ORGANIZED; TO PLAY SOON

With enthusiasm at a high pitch and a lot of splendid baseball material available, the Kraft Baseball nine made up of employes of the International Wood Products Company, of Niles, is being organized. Several games are in the offing, and from all indications the Kraft nine is going right to the front.

Frank Rodriques has been chosen captain, and Kenneth Leash will be manager.

The boys are already at work fixing up a diamond on the Wood Products company property, and Tuesday there were a couple of as o day a tractor and a big scraper were busy putting the grounds into shape.

To aid in the expense of getting supplies for the nine, a dance is to be held in Niles on the evening of July 23rd and all baseball enthusiasts —whether they dance or not—ought to get tickets to help the team along.

The new nine, which is made up of International Wood Products employees, has some of the best material in the valley. Without naming any names we can truthfully say that it has players who are entitled to be called stars in any amateur company. Watch our new ball nine!

TO REPRESENT DECOTO

Raymond McNulty will represent the Decoto Chamber of Commerce at the Trans-Continental Highway Exposition at Reno.

ALVARADO NINE DEFEATS MARINES SIX TO FOUR

The Alvarado baseball team defeated the Marines from Mare Island Sunday with a score of 6-4, at Alvarado. The Marines were given a dinner at Walt's Inn following the game.

SERVICE CLUB HAVE VACATION

No more meetings of the Centerville Service Club will be held until September, according to a decision reached at the meeting held last Thursday.

A cablegram of congratulations was sent to Miss Helen Wills in England, the tennis champion having Centerville girl formerly.

Representatives of the Oakland Tribune and Idora Park company asked the aid of the club in securing a Centerville entrant for the beauty contest to be held July 24 to select an Alameda county representative in the state beauty contest, the final goal of which will be the national beauty show at Atlantic City.

No further action was taken regarding the advertising slogan for the city for which a prize of $2.50 has been offered.

DECOTO-CENTERVILLE ROAD WORK PROGRESSES

Concrete is being poured on the Decoto-Centerville road at present. The bridge at the intersection of this and the Niles-Alvarado road has been completed.

M. WHITE OF DECOTO IS UNDER DOCTOR'S CARE

M. White of Decoto is under the care of a doctor, his eyes having been severely injured by acid while fighting the Little Tiajuana fire last week. He has been kept away from his work for several days.

RETURNS HOME

John Logan, proprietor of the Alvarado garage has returned home from a motor trip over the state.

LOUIS RUSCHIN, JR., TO BE ONE OF TWO EAGLE SCOUTS IN TOWNSHIP

Louis Ruschin, Jr., is expected to complete his tests at Diamond Camp, Boy Scout playground near Oakland, this week, for Eagle Scout rating.

When he completes these tests, Louis will be one of two Eagle Scouts in Washington Township.

SAN LEANDRO MAN HAS "DAM" HARD LUCK

Manuel Cardoza of San Leandro suffered a scalp wound while swimming under the Sunol dam Sunday. A piece of timber from a bridge under repair floated down stream and hit Cardoza upon the head while he was taking a shower bath under the spillway. He was knocked unconscious and pulled out by companions.

WILLIAMSON WINNING PRAISE FOR RODEO PICTURES

Jack Williamson, local representative of the Oakland Tribune, has been winning fame as a skilled photographer of live subjects, lately, his splendid pictures of the events at the Livermore Rodeo receiving statewide praise.

They have been appearing in the Tribune recently and are full of action. In many of them the bucking horses are shown with all four feet off the ground at once, and one, a picture of a wild bull, shows him in the same position.

While Williamson already has a wide reputation among professional photographers, the rodeo series bids fair to extend his rating as a adept to several states.

MEN GET MORRIS CHAIRS FOR ORGANIZATION WORK

A class of 12 candidates were initiated at the last meeting of the Maple camp, Woodmen of the World, in Centerville. This was the latest group of candidates enlisted during the recent membership drive which netted the camp a 25 per cent gain in membership in four months. J. D. Luiz, Jr., Bernard Lawlor and Manuel Equeira who were responsible for the majority of the new members, were presented with a Moris chair apiece, so that they might "take things easy" for a while.

IRVINGTON DAILY BIBLE SCHOOL IS BIG SUCCESS

Miss Lucile Briener, principal, Mrs. James Blacow and Mrs. Josh Chesbourne have been acting as teachers at the Daily Vacation Bible school held under the auspices of the Irvington Community church for the past two weeks, closing exercises being held Tuesday with about 125 present.

Pastor J. R. Stevenson states that they are delighted with the success of the school and expect to have another next summer.

Last Thursday the children of the school gave Mr. Stevenson a surprise birthday party. The school picnic was held in the canyon recently. The entire Sunday School will go to Alum Rock Park in the near future for an outing.

IN LAKE COUNTY

M. C. Wilder and family of Niles, are spending their vacation in Lake county.

TEN-DAY MEET IN IRVINGTON

Plans are practicaly complete for the opening of the ten-day session of the Latter Day Saints in Irvington, beginning Friday. About 700 delegates are expected, special trains from the south and middle-west having been arranged to bring the church people and their high officials to this annual encampment.

The delegates will live in tents during the convention. Several large tents have been provided for special meetings and gatherings. Many of the sessions will take place out of doors. The mornings will be devoted to instructive discourses and classes and the afternoons to recreation.

ROLE OF PEACE-MAKER PROVES UNFORTUNATE

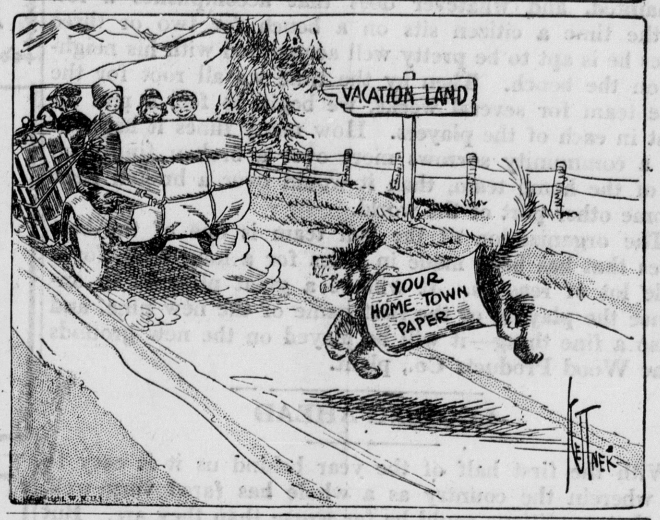
Jim Gray, mechanic in Oliver's garage in Niles, had two teeth knocked out when assuming the role of investigator and peace-maker in a fight between two Mexicans in the canyon Sunday night. Gray states that the Mexicans slugged him with a black-jack.

LANDMARK IN CANYON TO BE TORN AWAY

One of the familiar landmarks in Niles Canyon is to be done away with this week. The old brick smokestack, more than 100 feet high, is to be dynamited by the California Pottery company to make way for their new plant.

The reason a bride should have enough new clothes to last her for a year is there is always a chance they'll be the last new clothes she'll get for a long time.

A Faithful Follower



WITH TOWNSHIP WOMEN

(By GLADYS WILLIAMSON.)
(Telephone Niles 83)

LIBRARY ESTABLISHED IN TEMPORARY QUARTERS

Books from the old library building have been removed to the Easterday building and the librarian is doing business as usual. Removal of the books was of the "good turns daily" of the Boy Scouts of Niles.

A picture of the plans for the new $20,000 building to be erected as a gift from Mr. and Mrs. W. H. Ford to the community is displayed in the window of the temporary library.

As soon as the old building can be disposed of, work upon the new will be begun. We hope to have a detailed description of the plans in an early issue.

SUNDAY SCHOOL PICNIC AT THE WATER TEMPLE ON NEXT SATURDAY

Women of the community are centering their attention this week upon the annual picnic for the children of the Sunday School of the Niles Congregational church to be held Saturday at the Water Temple at Sunol. All pupils of the school and their parents are invited.

Those expecting to attend should meet at the church at 10 o'clock Saturday morning and arrangmements will be made for transportation for those who do not have cars. Each child is asked to bring his own sandwiches and the ladies of the Sunday School are preparing cake and salads. Any mother who wishes help in this mater might telephone Mrs. J. E. Townsend, (I am taking the liberty of making this suggestion myself.)

Rev. A. W. Seebart, pastor, and Mrs. Seebart expect to be in Niles for the picnic. Mr. Seebart has charge of the games and boys and small children are asked to bring balls, etc., so that the most fun possible can be secured from the day.

"Sunday School picnic!" What a host of memories those words conjure up. Stepping stones through the years. Visions of long lines of white tablecloths stretched end to end upon the grass, the good old days when everybody was a neighbor and every neighbor welcome. Saturday's picnic will one day be a memory for today's kiddies—so mothers, let's make the most of it!

MRS. ELLSWORTH ATTENDS 25TH ANNIVERSARY OF FORMER NILES COUPLE

Mrs. E. A. Ellsworth and family attended the 25th wedding anniversary celebration of her sister, Mrs. W. O. Cole at Vacaville Sunday. Mrs. Maston Dasel of Niles, another sister, and her husband, also attended as did a large number of relatives and friends from Oakland and Vacaville.

Mr. and Mrs. Cole were bride and grom in Niles 25 years ago, Mr. Cole being a representative of the Southern Pacific here. Although they have been away about 23 years there are still many warm friends who wish them happines on this occasion.

A chest of silver was presented to Mr. and Mrs. Cole by a group of relatives and numerous other gifts from friends were received.

Little Miss Barbara Ingram of Gridley, is visiting her great-grandmother at the Belvoir Hotel in Niles.

MRS. FOSTER TELLS US WHAT MUSIC CAN DO

When you have read the following article written especially for Township Women I am sure you will join with me in expressing appreciation to Mrs. Charlotte Huntley Foster, director of vocal music in the schools of the township for this splendid expression of the worth of music in the life of the nation.

Already Mrs. Foster has contributed so much to the community through her own music and that produced under her direction by not only the boys and girls in the schools, but the men and women in the night choral society and now during her vacation time she so generously takes the time to put down upon paper a few of the things she knows music can mean to everyone.

If you've been wondering whether you could afford private music lessons for son or daughter, be sure to read this before making your decision.

"AIM OF MUSIC IN WASHINGTON TOWNSHIP SCHOOLS"

By Charlotte Huntley Foster

"The subjects which enter into any school curriculum should be able to justify themselves in several different ways. Let us consider the justification of music as a regular subject; first, spiritually; second, socially; and third, economically.

"In the first place music furnishes an outlet for moral, and spiritual energies and makes the heart and mind responsive to ethical things. Let me quote the views of a few well-known men in regard to the study of music and the benefits derived therefrom.

"Woodrow Wilson during the great war said: 'The man who disparages it as a luxury and non-essential is doing the nation an injury. Music now more than ever before is a national need. There is no better way to express patriotism than through music.'

Theodore Roosevelt gave this admonition: 'Let the love of literature, painting, sculpture and above all, music, enter into your lives.'

"Redfern Mason recently told the people of San Francisco that 'the instrument on which the musician plays is not the piano, violin or organ; it is the soul of the hearer.'

"From this we can gather that good music coming to the lives of especially adolescent youth, when its mind is 'wax to receive and marble to retain' is an investment in future strength of character and appreciation of anl love for the beautiful; therefore, it justifies its presence in the curriculum as an active spiritual asset.

"Again, music justifies itself on purely social grounds. If it be true that it contributes to a more worthy use of leisure time, provides a delightful field of avocational interest, brings the school and community closer together and encourages good citizenship through cultivating the love of the beautiful and if it develops the cooperative spirit and creates a wholesome outlet for excess physical, mental and spiritual energies, then it justifies itself socially.

"Remember, 'the boy who is blowing a horn isn't blowing a safe, the boy who is rolling the drums isn't rolling the 'bones'; the boy who is drawing a bow in an orchestra isn't drawing a cue in a pool room.'

Thirdly,—any influence which lifts

(Continued on page Five)

BEAUTY CONTEST ENTRANT WILL BE CHOSEN SATUDAY

COUNTY REAPPRAISAL HEADS VISIT HERE TUESDAY

James G. Stafford, head of the reappraisal of Alameda county, his chief assistant A. M. Johnson, and Mr. Spears, who will have charge of this particular locality in the big task, were visitors in Niles Tuesday of this week. They are making a tour of inspection and getting data to use in the re-appraisal of the entire county.

Mr. Stafford has had wide experience in this line, having reappraised no less than 58 counties and cities previous to the Alameda county job, which he classes as a "fairly big job."

The board acts, said Mr. Johnson, as a kind of equalization board, and invites suggestions and information from land-owners in the sections in which the work is going on. Mr. Spears will be in charge of this section, and will probably be here often later on.

SAN JOSE ROAD WORK TO BE COMPLETED SOON

Supervisor Ralph Richmond spoke before the Alvarado Chamber of Commerce Monday night in regard to the lower San Jose highway repair work, which he stated is being speeded up as much as possible. This work is causing traffic to be detoured around Alvarado.

JUNE FINES SET RECORD FOR PAST SIX MONTHS

A total of $1,511 in fines was reported by Justice of the Peace J. A. Silva of Niles, this amount having been collected during the month of June. This sets the record since Judge Silva assumed office 6 months ago.

WHIST PARTY

Mrs. A. Booras of Second street, Niles, will be hostess at a whist party to be given by the Lady Maccabees Friday. Prizes are to be offered and refreshments will be served after the game.

FROM GRASS VALLEY

Mrs. J. H. Durham and children are visiting at Grass Valley. Dr. Durham has returned to Irvington.

NEW TEACHER

Miss Niletta LaGue of Irvington has been engaged to teach in the Mission San Jose grammar school next school term. Building improvements at the school are being made during the summer, according to E. J. Callahan, clerk of the board of trustees.

OWNER OF CAR IS LOCATED

The Auburn sedan which was recovered by Jack Goldner after a gun battle with a band of automobile thieves here nearly a month ago has been turned over to an Oakland insurance company.

The car was stolen from an Indiana city about two months ago. Its ownership was traced by numbers on the carburetor and generator. All other means of identification had been removed by the thieves. The thoroughness with which the various serial numbers had been obliterated or removed led officers to believe the car had been recovered from a band of professional auto trieves.

PRESBYTERIAN CHURCH SERVICES AT ALVARADO

Presbyterians and others who may desire to attend are reminded of the services at the Alvarado Presbyterian church next Sunday morning, July 17th. The following Sabbath the service is at Centerville. On the 31st of July the concluding service is at Alvarado. Mr. Moore is speaking.

There will be a brief mesage next Sunday on "The Great Ephesian Prayer." The other topics in order are: "The Power of Faith" and "The Books of Job." A cordial invitation to all is extended.

We don't know which is the worse, the guests who worry for fear their children will become a nuisance or those who don't care if they do.

The endorsement of Jack Goldner as chairman of the committee upon whom the choice of the Niles candidate in the approaching beauty contest rests, tabling of a petition for changing the location of the post office, and consideration of the Goodwill drive, were among the matters brought up at the Tuesday meeting of the Niles Chamber of Commerce

Mr. Goldner and his lieutenants are to make the selection of the young lady who will represent Niles in the beauty contest, next Saturday evening, when the contestants will appear at the Niles Theater. The one chosen to represent Niles will go to Idora Park on July 24th, and if successful there goes to Atlantic City to take part in the national beauty contest. Whether she wins or not, the contestant will be entitled to go to the Mark Hopkins hotel in San Francisco and take part in the competition where Miss California will be chosen.

President Duffey announced that a petition had been given him asking that the Niles post office be moved to a new location. Mr. Ellsworth, whose building had been mentioned on the streets during the past week as the proposed new location, said that such was not the case. The petition was thereupon tabled or indefinitely postponed.

Saturday next, July 16th, is the date on which collections of waste for the Goodwill Industries will take place by the Boy Scouts. It was announced that a room in the Odd Fellows building had been secured as a storeroom, where goods could be left. Otherwise they should be put on the sidewalk in front of the home prior to 9 a. m.

NEXT SATURDAY IS SALVAGE DAY

Niles and Centerville to Have City-Wide Campaign for Goodwill Industries

Next Saturday, July 16th will be Salvage Day for the Goodwill Industries, with the Boy Scouts of the township as active participants in the drive.

Waste materials of all kinds, including waste paper, old clothes, old shoes and other useless material as far as the average home is concerned, will be gathered up by the Boy Scouts and turned over to the Goodwill Industries, to be used for the benefit of the poor and unfortunate who are out of work.

The Goodwill Industries is a National organization, operating in 28 of the great cities of the North, South, East and West, and has everywhere met with the enthusiastic support of the public. Their mothod of operation is to gather discarded clothing, furniture, shoes, newspapers, magazines, books, etc and all articles of any possible value that can be mended and repaired.

Aged and handicapped dependents are employed in the reconditioning of this waste. Several lines of vocational training have been established for them. When reconditioned, the articles are sold at a nominal price to the worthy poor. The receipts are used to pay the wages of those workers, as well as to defray the expenses of operating.

The Goodwill Industries is a Social Service enterprise which rebuilds and sells discarded articles, thus seeking to eliminate the necessity of charity by giving employment to worthy, needy, people, and furnishing many necessities of the home at a very low cost to the poor.

The Boy Scouts are giving freely of their time to this most worthy cause—which has the support and endorsement of the Niles Chamber of Commerce and the American Legion of the township.

They ask you to help them by getting your old clothing, newspapers, magazines, etc., bundled up in separate bundles on next Saturday, and by 9 a. m. putting them on the sidewalk in front of your home or place of business. The Goodwill Industries are also asking all places of business to give their waste, too, stoves, hats, shoes, rugs, carpets, furniture, or anything of possible value.

Don't forget the date, July 16th, next Saturday. Put your things on the sidewalk, the Boy Scouts will do the rest!

NOTICE OF SHERIFF'S SALE OF REAL PROPERTY ON EXECUTION

Jonas Schwartz, plaintiff, vs. J. F. S. Brandon, defendant.

No. 60-Ind. Acct.

By virtue of a Writ of Execution, issued out of the Superior Court of the State of California, in and for the County of Alameda, wherein Jonas Schwartz is plaintiff, and J. F. S. Brandon is defendant, upon a judgment rendered by the said Court on the 27th day of June, 1927, for the sum of $3988.87 lawful money of the United States, besides interest and costs, I have heretofore levied upon all the right, title, claim and interest of J. F. S. Brandon the therein named defendant, of, in and to the following described Real Property, to-wit:

All those certain pieces or parcels of land situate, lying and being in the Township of Washington, County of Alameda, State of California, more particularly described as follows, to-wit:

Begining at a point in the center line of the County Road leading from Niles to Mowry's Landing; distant thereon South 33 degrees, 15 minutes West, 12.89 chains from the Center line of the County Road leading from Centerville to Irvington and running thence along the center line of the County Road leading from Niles to Mowry's Landing South 33 degrees, 15 minutes West 12.84 chains; thence leaving said last named road North 57 degrees West 15.61 chains; thence North 33 degrees 30 minutes East, 12.84 chains; and thence South 57 degrees East 15.545 chains to the point of beginning.

Containing twenty acres and being a portion of survey number 115 of the lands of Ex-Mission San Jose.

Excepting therefrom that ten (10) acre piece of land conveyed by the above named defendant and Thereza S. Brandon, his wife, to Joe P. Silva by Deed dated July 14, 1926, and recorded on July 16, 1926, in Vol. 1378 at page 66, Official Records of the County Recorder, Alameda County, California.

PUBLIC NOTICE is hereby given that I will on Monday, the first day of August, A. D. 1927, at Ten o'clock A. M., of said day, in front of the Broadway entrance of the Court House, of the County of Alameda, in the City of Oakland, County of Alameda, State of California, sell at PUBLIC AUCTION, for lawful money of the United States, all the right, title, claim and interest of said defendant J. F. S. Brandon, of in and to the above described real property, or so much thereof as may be necessary to raise sufficient money to satisfy said judgment, with interest and costs, etc.; to the highest and best bidder.

A SPLENDID THING

The formation of the Kraft baseball team, of Niles, is a splendid thing. Besides being a fine exercise for the players and a source of much enjoyment for them and their friends, the ball team will accomplish it is hoped, what is even more important—it will create a community spirit. Besides this the ball nine will get the community better acquainted, and whatever does that accomplishes a lot. By the time a citizen sits on a bench for two or three games he is apt to be pretty well acquainted with his neighbor on the bench. Then by the time we all root for the home team for several weeks, we begin to feel a real interest in each of the players. How many times it happens that a community sorrows more over a broken finger on one of the home team, than it would over a broken neck in some other part of the world.

The organization of the ball team is one of the best moves that has been made in Niles for a long time, for a whole lot of reasons. It will be a great pleasure to announce the playing of the first game of the new nine, and —also a fine thing—it will be played on the new grounds at the Wood Products Co., plant.

LOOKING AHEAD

With the first half of the year behind us it is easy to see wherein the country as a whole has fared very well, and that conditions could be far worse than they are. But any of our readers who are nursing the belief that the latter half will be exciting and people more prosperous are to a great extent drawing on their imaginations.

We don't want to paint any dark pictures, but the suspicion is strong that there is no foundation for over-enthusiasm. Taken the country over, the crops are below normal. Industrial lines are busy in some sections but as a whole there is considerable unemployment and a let down in production in steel and autos. The automobile factories have not kept up to their schedules set the first of the year, and this means that every other industry will be slowed down somewhat.

In face of present conditions, and from what those in a position to know are predicting, the safe thing for the man with a job is to hang on to that job. Too many autos, too much pleasure-seeking and too much idleness—not to mention the biggest curse of all, moonshine liquor, are sure to leave an economic headache in their wake, which is about what we as a nation have to face.

A DEAD GIVEAWAY

According to a statement in an eastern paper a man's character is revealed by his automobile. Oscar Cornelius of Little Rock, says he can tell you by your car. That a dangling license plate, muddy fenders and dirty windows reflect slovenliness. A dusty top, even though the body is clean and shiny, shows that the owner likes to revel in outside appearances and doesn't care about cleanliness beneath his clothing. He says the selfish inconsiderate character is shown by the man who cuts in ahead of others and hogs the road for himself, and that the hot tempered man or woman who can't leave their tempers at home but display them in some way or another falls into this class.

With all due allowance for the writer who likes to make a big story, there is some truth in what he says. But it's discomforting to know that not even our private affairs are not any longer our own, but that our auto tells the world exactly the kind of a person we are. The best way to avoid worry because your auto can give you away is to avoid being slovenly and thoughtless; avoid profanity, be gentlemanly and you'll get by pretty well. And if consistently folowed it will give you a disposition that will make you the best-liked person in the entire community.

CHANGES TO COME

Of course it is not probable that anyone in Washington Township will live to see it, but we feel confident that the time will come when a frame house or a frame barn will be a novelty here, and most everywhere else. Three years ago a Michigan erected a barn of steel, and experts have declared that it will outlast four built of any other material. It is rat-proof, wind-proof, fire-proof and capable of outlasting any other known material. Insurance is hardly necessary. Well—we have for years been building in cities with concrete and steel, and there is no reason why the same idea may not work in the country. Wood undoubtedly will remain in favor for many years, but ultimately the more lasting material will come into favor.

The work now going on at the plant of the California Pottery Works in Niles canyon is said to be the beginning of greater activity, and that eventually the main plant of the company at Oakland will have to be moved out here. Such a thing would mean much for Niles and the surrounding country, for besides affording employment in the actual work of making tiling, etc, there would be many other dependent businesses come.

"Some people's idea of roughing it," says Jack Goldner, "is to drive in a sedan with one window lowered."

Nowdays you don't have to train up a child in the way it should go—the state legislature looks after that.

It is well to remember that it is far more important to support yourself than to boost your favorite candidate.

United States' Illiteracy Bill a Heavy Tax on the Nation

By FLOYD PARSONS, Professor of Economics.

IN AMERICA, we find a lot of people educated so far beyond the capacity of their intellects that they live in a world of impractical theories. Then, turning in the other direction, we find that here in our own country, nearly one-quarter of our adult population cannot read a newspaper or write an intelligent letter.

Furthermore, out of 35,000,000 population between the ages of five and seventeen, 3,000,000 do not go to school. If there is any truth in the conclusions of one group of investigators that an ordinary school education doubles a child's potential earning powers, then it is conservative to say that America's illiteracy bill now totals at least a billion dollars a year.

Along with the challenge of illiteracy to American education is the menace of propaganda. The educator is interested in how people think—the propagandist in what they think. And the principal desire of the educational propagandist is that people act promptly without further thought or investigation. Teachers are pulling for maturer thinking and propagandists for hastier thinking.

And the battle is one-sided. The compensation given the propagandist is many times more than that paid the professional educator. Until, therefore, we pay our teachers better money, we may expect to see propagandists winning the battle for looser thinking and hastier conclusions and a more errorful America. Each new convert to propaganda increases the army of people who refuse to think. And a nation made up of a minimum of doubters and skeptics will not make rapid advances in education. Doubt is the foundation stone of progress.

University Students Interested in Public Policies Only as Citizens

By DAVID KINLEY, President University of Illinois.

In the years since the war there has been a notable increase in the attempts to use college and university students for purposes of propaganda. Conferences have been called by individuals, "representatives" of students and institutions have been sent to attend them, and resolutions have been duly drawn up to be presented to congress or the President, or to some other public authority.

I have refused to participate in any of these conferences. I have taken the ground that if the students wish to participate, they are free to do so; that if they wish my help I will give it; but that I have no right to send one or two students, picked by myself, to any conference and say that they represent the 13,000 men and women of the University of Illinois. They do not represent them in any true sense, because they were not selected by them.

Conferences of the kind referred to have been called mainly to help on movements for or against some particular public policy. Such matters are not students' business. Their interest in those matters is their interest as citizens and not as students. Such attempts to "use" college and university students seem to me highly objectionable. In some other than English-speaking countries it has been customary for university students to interfere in governmental matters, national and international. The practice has never prevailed among university students in English-speaking countries. Such practice, in my opinion, is unfortunate and not within the province of university students.

Atmosphere of Fear From Bottom to Top in World of Business

By ANNE W. ARMSTRONG, Business Problem Lecturer.

Our great businesses are breeding atmospheres in which fear flourishes. Granite walls, marble corridors, smart uniformed guides, hushed anterooms, luxurious suites—the environment conspires to awe what with all its bravado is the essentially timid human spirit.

But it is not merely a question of the problem of the right kind of home-like and amiable scenery. To be candid, it is the business leader far more than the business scene that prevents business life from fulfilling more of the conditions of the good life. They have become unapproachable and cold in their personal relations with their employees. And this has made their employees afraid of them. And so there is fear in the ranks of labor in our great corporations.

But there is also fear at the top. Business leaders are plagued day and night by visions of Bolshevists and a hundred other bugaboos. Many business men see industrial spooks everywhere and they live in a state of perpetual fear.

If it is not fear, what is the source of that savage abuse heaped upon anyone who presumes to point out a singe business blemish? In Roosevelt's day, he was, at worst, a muckraker. Now even the most friendly and good-humored critic of business has become the garbage gatherer. Or he has fastened upon him the supreme epithet of condemnation—"Uplifter."

We must get rid of fear in business. It is destroying character. It is limiting production. It is keeping business back.

Speed of Modern Life Cuts Into Time for Meditation and Reflection

By DR. SELDEN P. DELANY, New York.

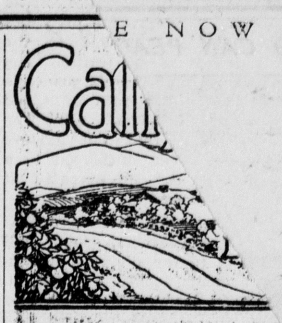
The breakneck speed of the Twentieth century and the ever-growing duties of a modern pastor are occupying some clergymen to such an extent that they do not have time to pray.

The speed and intensity of modern life have virtually eliminated any time which once was given over to meditation and reflection on the part of clergy and laymen. The lack of reflection is one of the greatest evils of modern life.

America needs silence and solitude. The question recently was asked: "Is the woman of leisure a danger to society?" If her leisure time is properly applied, there is no question but that such a woman would be a decided asset to society. We need more leisure in this day and age, but we also need to apply our leisure time to better ends. Religion, in its true sense, is what a man does with his solitude.

No one will doubt the effectiveness and value of two minutes of silence on Armistice day, or when the Unknown Soldier was buried in Washington. If such a short period of meditation and reflection is so effective, what a tremendous effect a period of ten or fifteen minutes a day given to quiet thinking would have upon the nation and Christianity!

Clergymen of today expect their parishioners to regard their churches as "houses of prayer," yet too often the clergyman does not observe the church as such himself. Faith and depth of character can be developed only through meditation.



Restrictions on water for irrigation purposes in Woodland, Yolo County, were removed on a month's test. The city trustees discover that there is no misuse of water and that the consumption is not materially greater than under the restriction plan, the ban will for all time be lifted off water, except in times of great emergency.

The caterpillars or greenish-banded worms of the lesser corn stalk borer have appeared in a few fields near El Centro, which have formerly produced wheat, but have been sown to milo this season. Little damage has been noticed in wheat, cowpeas, or sudan, but milo or corn is killed in short order.

An unexpected heavy demand for orange groves is causing realty activity in the orange belt. Despite the fact that light crops are the prediction for next year the buyers are plentiful, although most of them are seeking the groves that have a normal or better crop, feeling certain that with a light crop prices will be good and the coming crop will take care of the first payment that must be made.

A tree breeding experiment station has been established at Placerville by James G. Eddy, Seattle lumberman, in the hope of developing hybrids that will grow more rapidly. Professor J. L. Collins of the College of Agriculture, University of California, in explaining the work being undertaken, says the breeding work of Burbank and others before him, have demonstrated the feasibility of the work.

Planning to meet greater demands for rapid transportation of the increasing fruit crop of the Sacramento valley, the Southern Pacific Company is spending more than $300,000 of a $400,000 improvement program on trackage extensions in that district. In Sutter county, where there are large peach orchards, $215,000 is being spent to extend trackage facilities for loading, while at Walnut Grove and Walnut Grove wharf $75,000 is being spent for tracks. At Newcastle, Placer county, $24,000 is being invested in new spurs. In the Roseville yards $100,000 is being expended to extend the switch yard to accommodate 100-car trains.

Exceeding by over 28,000 carloads the 1925 movement, California shipped 270,266 cars of fruits and vegetables in 1926, according to Homer A. Harris, Los Angeles representative of the Bureau of Agricultural Economics, United States Department of Agriculture, in his annual summary of carlot shipments, issued recently. In 1925 the total movement was 242,107 cars while that of 1924 was 223,114. Grapes led in volume of shipments, with a total movement of 64,394 cars and oranges were second, with 46,986 cars.

Dr. W. A. Walker, former president of the California State Farm Bureau Federation, is a candidate for director of the State Department of Agriculture to succeed G. H. Hecke, according to reports from the capital. Dr. Walker is said to have the backing of organized labor and a section of the farm bureau. Hecke, however, in political circles, is believed to be slated for retention.

Prices obtained for the early California fruit shipments to the East were unusually high, according to J. L. Nagle, manager of the California Fruit Exchange. Nagle said apricots ran $1000 a car higher than last season. The prices on early peaches also are high. Nagle estimates the State has an 80 per cent peach crop, exclusive of clings, which will run almost normal.

Greater share in the profits of the grape industry should go to the grower, asserted Donald Conn, president and general manager of the California Vineyardists' Association, in a speech delivered at Bakersfield recently. In a survey it has been shown that an average minimum retail price of table grapes in the Eastern market last fall approximated 12 cents a pound or $240 a ton, while it is safe to say that the growers in California did not receive $30 a ton, said Conn.

The district around Fullerton will harvest 1000 tons of walnuts this season, according to Arthur Staley, manager of the Fullerton Placentia Walnut Growers' Association. Indications point to the largest crop ever produced in territory. Codling moth and aphis have not been serious problems of the walnut growers this season.

Northern Orange county will produce about 500 tons of persimmons this year, according to G. W. Sherwood, president of the Persimmon Marketing Association, which is a considerable gain over last year's 200 tons.

California's mint crop will jump from $35,000 total value in 1926 to $150,000 this year, it is estimated. This is a new crop for California and commercial production is at present confined to Stanislaus and Tulare Counties.

Italian competition mean that dismaking serious inroads tes good muindustry of the Pacific ot good and hearing before the tariff Germany in Washington on the ap agner, not growers in four Western le were a 50 per cent increase in th because pitted cherries. Representausic in importers and the commercial er be of the Italian embassy, were prough to oppose the proposed increase. du-

Representing the agricultural department of the German government, Fritz Guenther, inspector of government estates and forest lands, is in Sacramento after an eight-month tour of the United States to study fruit marketing conditions in the United States. Particularly is the German government interested in the organization of American marketing institutions and in the standardization of fruit containers. Guenther's trip to the United States is the result of the excellent reports of fruit marketing systems in the United States and particularly in California.

Beef cattle this Spring have sold the highest for the season since 1920 when prices were an a high level because of war inflation, according to a review of the Spring cattle market issued by the Bureau of Agricultural Economics, United States Department of Agriculture. All classes and grades of cattle have participated in the advance, the general price over last year and the five-year average ranging from 12 to 27 per cent.

At the annual meeting of the Chino Valley Apple Growers' Association which was held at Chino late in June, W. E. Disher, manager of the organization, stated that the apple crop of the valley is estimated at 52 per cent of normal. This estimate was made after a survey of the orchards in the district.

Cattlemen pasturing steers in the vicinity of Brawley, report a number of losses from theft, and a reward of $200 has been offered by them for information leading to the arrest of the guilty ones. It is believed that the thieves operate with trucks. As fat cattle are worth from $100 to $125 a head the losses mount up rapidly.

While there will be a decrease of approximately 16,000 acres in rice plantings in Glenn and Colusa Counties this year, there is, according to a conservative estimate, an increase of 10,000 acres of rice planted in California. The largest decrease in the history of Colusa and Glenn Counties is due primarily to the fact that many rice growers are leaving their lands, which have been under intense cultivation during the last few years, remains idle this year.

The Sierra and northern interior counties showed a remarkable gain in milkfat production during the two-year period from 1924 to 1926, reports Sam H. Greene, secretary-manager of the California Dairy Council, who has completed an analysis of production figures released by the state bureau of dairy control. The greatest percentage of gain in milkfat production for the two-year period was made by Sierra County, which showed an increase of 120 per cent.

With plans for a project to irrigate 15,000 acres near Angels Camp, the Calaveras Water Users' Association, Inc., has applied to the state division of water rights for a permit to store 12,000 acre feet of water in Highland Creek. The reservoir site is in Spicer's eadows in Tuolumne and Alpine Counties, and the water would be stored by a dam fourteen feet in hight. An expenditure of $50,000 is contemplated under the application.

Kern County's grape crop will be less than normal this season with the exception of juice grapes, according to estimates made at the horticultural commissioner's office here. Shipments of grapes from this county will be started about July 25th. The grape crop will be almost a month later this season than last because of the cool spring weather. Juice grapes this year will be 100 per cent of the normal crop, but table grapes will be only 85 per cent of normal and raisin grapes 70 per cent of normal. Last year Kern County shipped approximately 4,000 carloads of grapes.

Testing Times

ON a levee at a bend in the Mississippi a thousand men were building with sand-bags a second-line defense against rising waters which threatened hundreds of miles of fertile cropland. Over a telephone, housed in a wooden box nailed to a tree, an engineer was talking to headquarters—reporting on the progress of the work, asking for reinforcements and additional material, receiving Weather Bureau forecasts which would be vitally important to him in planning the strategy of this grim battle for lives and property.

The telephone had been put in service but a few minutes before, after a construction crew had worked from sunrise to sunset, often waist-deep in swamp water, to string fifteen miles of line to this isolated outpost.

Such is telephone service in an emergency—service in which telephone men and women do very much the same things they do every day of their lives, but do them under conditions that give vivid emphasis to the import of their efficiency, devotion, and fidelity to public interests.

In such crises, when even the most commonplace of calls may become a matter of life or death, the public realizes its day-by-day dependence upon the telephone and upon the men and women who make of it an instrumentality of human service.

Cancellation of the Venice pier resort, drowning of the horse L announced following a con tween the owners of the act Park Amusement Association. ning, after diving forty feet f platform, swam out to sea instea shoreward and when expert swimmers finally headed the floundering animal ashore, it expired on the beach. Leona Carver, owner and rider in many leaps into the water, fainted when the pulmotor failed to revive her pet. Lightning was said to be valued at $20,000. Only a few hours prior to the equine tragedy Municipal Judge Wilson of Los Angeles had ruled that pier promoters and the show owners had not been guilty of cruelty to animals in compelling the horse to dive, as charged by humane society officers.

The services of fourteen submarines and attending vessels have just been offered to the University of California by Captain Ridley McLean, commanding officer in charge of the Submarine Divisions of the United States Navy, for the purpose of making studies of the surface temperatures of the Pacific Ocean between California and Hawaii. The figures will be used in a search for some method of seasonal rainfall forecast by Dr. G. F. McEwen.

The value of gold, silver, copper, lead zinc produced at the mines in California in 1926 was $20,950,801, a decrease of $3,233,553, or 14 per cent, as compared with the value of these metals produced in 1925, according to statistics compiled by J. M. Hill of the bureau of mines. There were decreased yields of 9 per cent in gold, 40 per cent in the value of silver and 30 per cent in the value of copper, but increases of 13 per cent in the value of lead and 76 per cent in the value of zinc produced, as compared with the values of these metals in 1925.

The order for the second ship for the Panama Pacific Line service has just been placed. The new steamer will be 30,000 tons displacement, and identical in every respect with the company's new steamer "California," which will be launched in October. With this new tonnage the Panama Pacific Line will have the two largest ships ever built under the American flag, with a contract speed of 18 knots per hour, they will cut two days from the present length of the voyage between New York and California ports. Each steamer will have capacity of 800 passengers and 8,000 tons of freight. Special attention was given in their design for refrigerated cargo, and each ship will have 100,000 cubic feet of space available for shipment of fruits and other perishable commodities.

A veritable hornet's nest of planes was unloosed on the air above Santa Ana when the first international peace aviation jubilee got under way July 2 with some three-score of the latest in man-made aerial wasps in action.

"Employes" of the San Quentin jute mill may find themselves without jobs if the Federal Government persuades farmers to handle their grain in bulk, instead of in bags. The Department of Agriculture has established in San Francisco a laboratory to demonstrate that elevators are much cheaper and better than jute sacks for handling grain.

assesse... set at $164,289,... more than $13,000,000 over ... total. That Sacramento has $26,869 is also shown. For the city of Sacramento the assessed valuation is $103,673,360, which amount is $4,000,000 in excess of last year's total.

During the first three months of 1927 commercial fishermen operating in the inland waters and off the coast of California in the Pacific Ocean caught and marketed 159,390,739 pounds of fish, according to the quarterly report compiled by the Department of Commercial Fisheries of the State Fish and Game Commission. The greatest volume of fish caught was 147,840,632 pounds of sardines taken during this three-month period. Running next comes rock cod, which totals 2,401,811 pounds, and next is sole, which totals 2,225,476 pounds.

Condemnation of Gov. Young's action in pardoning Charlotte Anita Whitney who was convicted of violation of the California Criminal Syndicalism Act was expressed in a resolution adopted by the Glendale Post of the American Legion. The post also resolved to instruct its delegates to the County Council to take steps to get the matter before the State convention of the Legion to be held at Santa Barbara, August 2 to 4, next.

California's 400 National Guard officers, last week received checks from the State for $23 each as their clothing allowance for last year, which is the State's payment for the upkeep of their uniforms.

The historic Union Church and seven dwellings in the pioneer mining town of Shasta, eight miles northwest of Redding, were destroyed by fire recently with a loss of $50,000. The most serious loss was the church. It was built in the early sixties, and in its large belfry were inscribed names of thousands of persons who had been buried from it. The bell was one of the finest in the State, having a sweet tone, seldom duplicated.

Ranking fifth in the national list for highest total values of property subject to taxation, and third among those States compelled to make large annual payments for Governmental functions, California last year was one of three States which went through the fiscal period without making a property tax for State purposes.

Work of remodeling the Masonic Temple in Napa is now under way, and will be completed in two months. The entire front of the three-story building is to be changed to Mission type of architecture and the old tower of the structure will be removed. The temple was built in 1889.

Howard Chaffee, former University of Southern California track star, is reported to be in Toronto where he will enter the Lake Ontario swim for a purse of $50,000, August 31. Chaffee was one of the last six men to leave the water in the recent Catalina Island swim.

Character of Glass Only Recently Known

The manufacture of glass antedates authentic history. It is only about three-quarters of a century, however, since its true character was ascertained. It is now generally conceded to be a salt—a chemical compound resulting from the union of an acid with a base. The acid is silica, the same that is found in quartz, or the quartz particles of sand. Hence the use of sand in its manufacture.

The base may be potash (or soda), together with alumina and lime—or lead may take the place of lime. Lime makes a hard glass, one less susceptible to acids and suited to windows and chemical purposes. Lead, a softer, more fusible and more lustrous article, suitable for optical instruments.

All acids act to some extent on glass, especially if the latter has an excess of alkali. Even wine may corrode the bottles wherein it is contained. The moisture of the air often dissolves out the alkali, causing the rainbow-like colors (iridescence) of some window panes.

Lucretia Mott's Diplomacy

Lucretia Mott, who helped to form the anti-slavery society in Philadelphia in 1833 and who soon afterward founded the Female Anti-Slavery society, took an active part in the affairs of these societies. When a New York anti-slavery society session was broken up by a mob, many of its speakers were roughly handled. Perceiving that many of the women were afraid, Mrs. Mott said to her escort, "Won't thee look after some of the others?"

"But who will take care of you?" he asked.

"This man," laying her hand on the arm of one of the roughest of the mob. "He will see me safely through." The astonished man, with respectful manner, took her to a place of safety. —Kansas City Star.

Classes of Villainy

Villainy is divided into the amiable and the rude. The road agent bluntly holds up his victims at the point of a pistol. The statesman amiably accomplishes his villainy with a burdensome appropriation, or with a war which causes more deaths in a single battle than road agents ever caused. We all engage in villainy more or less, and it is always a mistake. Honesty would be easier and pay better in every way. We have never been able to get rid of the old barbarian's notion that when he saw anything he liked he had a right to take it.—E. W. Howe's Monthly.

e division's ised on the traffic. The this principle rate of speed Vehicle Act. The that the modern een developed to a can be operated at h safety.

remains unchanged that the maximum speed shall ng to the dictates of cau- common sense. The fifteen- mit in business districts and enty-mile limit in residence ons and other similar safeguards restrictions are unchanged.

The law is clear and explicit, requiring the motorist 'to drive at a careful and prudent speed not greater than is reasonable and proper, having due regard to the traffic, and to the surface and width of the highway; and so as not to endanger the life, limb or property of any person.'

"The primary rule prevails that the fixing of the maximum speed at any ...ure does not mean that operators ...ers are privileged to drive at that speed unless it is safe to do so.

"Futhermore, no 'inching' over the forty-mile mark will be allowed. The five-mile-an-hour leeway taken by many motorists under the old thirty-five-mile limit and countenanced in some parts of the state is no more. The 'courtesy' five miles has been enacted into law, and the motorists should stay within the law.

"Traffic will undobtedly be speeded up by this change, without sacrifice of safety. There remains, however, a companion move of enforcement that the full benefit of the new limit may be enjoyed by traffic.

"The slow-moving vehicle should not be permitted to block the highway by hogging the center of the road. It is useless to build broad highways and increase the speed limit to facilitate traffic if the snail's-pace driver is permitted to hold up a long line of traffic behind.

"Motorists who prefer to proceed slowly should keep well to the right of the road. Some there are who would rather lose life itself than give way an inch of the center of the road. This endangers those who seek to pass in a lawful manner within the speed limit to drive far over to the wrong side of the road. Traffic is not only hampered and congested but a positive danger is created by the slow driver disregarding common courtesy and rules of the road.

"There is just as much danger, if not more, at low speedi in the wrong place on the highway, as at high speed in the proper lane of travel."

There are still a lot of fellows around Washington Township who would rather go to jail for a few weeks than to have to carve a chicken when there's company at the table.

The hardest thing of all for Colonel Lindbergh to stand was the non-stop flights of oratory he ran into when he got back of America.

CHEVROLET

Hot Snacks For Cold Evenings

By CAROLINE B. KING
Culinary expert and lecturer on household science.

Tomato Cheese Souffle

Melt two tablespoonfuls butter and add two tablespoonfuls of flour, cook together to a smooth paste, then add a cup of strained tomato juice and simmer, stirring all the time, until thick. Season with salt, pepper and paprika to taste. Remove from the fire and beat in a cupful of grated cheese and the well-beaten yolks of two eggs. Finally fold in the whites of the eggs whipped to a stiff dry froth. Turn into a buttered baking dish, place in a dripping pan and surround with warm water. Set the pan in the oven and bake twenty minutes. Serve at once, in the baking dish.

Piquant Prunes

Wash, soak and steam large meaty prunes. Through slits in the sides remove stones and insert small stuffed olives. Then wrap each prune in a very thin slice of bacon, fasten with a toothpick and bake in a hot oven or broil until the bacon is crisp. Serve on triangles of toast.

Tortillas

Cook a cupful of yellow cornmeal in three cupfuls of boiling water for fifteen minutes, add a cupful of grated cheese and a teaspoonful of baking powder. Beat well, and pour into a well-greased dripping pan. Bake like cornbread and cut in squares before serving.

Hot Potato Salad

Cook four large or six small potatoes in their skins, cool, peel and chop coarsely. Place in frying pan, sprinkle with salt and pepper, and one tablespoonful each of chopped onion and parsley. Beat together one-half cupful of olive oil, four tablespoonfuls of vinegar, and one-half teaspoonful dry mustard. Pour over the potatoes, stir well and heat through. Serve in a salad bowl garnished with broiled sardines.

Prune Croquettes

Soak one pound of prunes in a quart of cold water, simmer till tender, cool, drain, pit and chop pulp very fine. Add bread crumbs to make quite stiff, two tablespoonfuls of lemon juice, a pinch of cinnamon and a tablespoonful of sugar. Form into balls the size of walnuts, roll in beaten egg, then in flour, and fry a golden brown in hot fat.

Creole Rice

Cut four slices of bacon into small pieces and cook till crisp, to the fat in the pan add a tablespoonful of chopped onion, one green pepper cut in strips, and half a pimento shredded. Cook till the onion is brown, then add one and one-half cupfuls of boiled rice, and the same quantity of strained tomato juice. Season with salt, pepper and butter and sprinkle when serving with paprika.

Cheese Dreams

Grate enough cheese to make two cups, or run it through the chopper, making it quite soft. To the cheese add one well beaten egg, half a teaspoonful of salt, one-quarter teaspoonful of paprika, dash each of black and white pepper and a tablespoonful of Worcestershire sauce. Spread the mixture on pieces of bread cut as for toast, on each lay a slice of bacon and put in a hot oven; cook till bread toasts and the cheese melts and puffs and bacon cooks a light brown. Serve hot.

STRIKING COMMENTS ON JAPAN BY ALLEN SHINN; EARTHQUAKE EXPERIENCE

Allen Shinn may not appreciate being put in the "ladies' column" but a glance at the letters quoted in part below will entirely efface any insinuation of femininity in connection with that young man. We're using these interesting glimpses into lands far away here because we're anxious to crowd into this space all the variety we can and we feel justified in appropriating these letters because they were written to his mother, Mrs. J. C. Shinn.

This from Tokyo:

"March 10—The weather over here is rather miserable I would say, foggy and cold and sometimes snow. We had quite an earthquake here the other day. The ship was lying out in the outskirts of the city in the Mitsubishi dry-docks and I had just come back from Kobe. It was about 7 o'clock in the evening and as I was crossing a small open space in front of the yard gates, all of a sudden it started to shake and it sure shook. I had a job to stand up for a while. Almost immediately all the lights went out—a precaution against fire—but one fire started anyway.

"The Japs are very efficient and it did not spread. It was quite a sight before the lights went out, everybody running around and yelling, etc., and the lights all swinging around. It made me rather dizzy.

"One wall of a three-story brick building inside the shipyard and about a half a block away came down with a crash, but outside of that there was little damage in that section of the city, as (outside of the shipyard) all the buildings are low native dwellings. An hour after things had subsided they came out with a Japanese "extra." I'll send you one. I don't know just what it says but it will be interesting to keep. The damage was not nearly as great or the quake as severe here as in Kinasaki and other towns near there, where hundreds were killed or injured and whole villages destroyed."

(Another letter)

"I have so far had quite an enjoyable time in Japan and seen a little of the outlying country also. While the ship was in Yoko I went up to Tokyo and stayed overnight there at the Marunouchi Hotel and in the morning I got a chance to

the spiritual tone of the individual, making him more efficient socially is underwriting the future of the individual and community by decreasing chances of economic failure and dependence. The great detective, William J. Burns, stated that 'when there is plenty of music and entertainment in a community, juvenile crime is at a minimum.'

"Is there not more eionomis justification in spending money for crime prevention than for crime correction?

"Charles Schwab, great steel magnate, says, 'Music fills a neel in life that nothing else can satisfy. It is restful and inspiring after the cares of the business day and I believe that men respond to it in the factory as well as in the home, because it helps them to forget their cares.'

"We might consider the three chief purposes of music and their functions: The awakening and cultivation of music appreciation; the development of music as an avocation; and the choice of music as a vocation.

"By appreciation we mean that discrimination whih separates good music from that which is not good and cultivaes a love for it. Germany produced Beethoven and Wagner, not because the German people were more musical than we but because they learned to love good music in childhood. America will never be a great musical nation except through proper and continuous musical education in the public schools.

"It is our duty as teachers, parents, or citizens to help the boys and girls who are forming their tastes and ideals to choose between syncopated jazz and symphony, between trash and treasure, between mushiness and music.

"Of all avocations music is the most comprehensive for it supplies so many avenues of approach through both vocal and instrumental channels.

"There is a wealth of opportunity for vocal expression through solos, duets, quartettes, glee clubs, choruses and community singing. All these are possible in any community for 'the voice is the one universal instrument.' Instrumental music furnishes as many different opportunities as there are instruments.

"The schools may offer splendid opportunity for the especially talented student who will want to become a musician. The early school years of instruction of a variety of phases of music helps him to make a choice.

"However, the real function of the public school is to bring about an appreciation which means to know, to love, to choose and to be influenced by good music."

INFORMAL TEA GIVEN FOR MRS. HARRY HUNT

Mrs. W. H. Ford, Mrs. James R. Whipple and Mrs. J. E. Thane were joint hostesses at an informal tea given at the home of Mrs. Thane in Niles Monday afternoon for Mrs. Harry Hunt, who is visiting here from Salinas. Only a few intimate friends were included.

GIRLS WRITE SPLENDID ARTICLE ON BENEFITS OF CAMP LIFE

"Through the close association of the girls in camp, all learned to love and appreciate the ideal life of a Camp Fire Girl," write Gertrude Ellsworth and Elizabeth Shinn in an article done especially for Township Women regarding their recent visit to camp. They have given us a real glimpse of the wholesome, beneficial good times members of this organization can have.

"THE CAMPFIRE CAMP"
By
Gertrude Ellsworth & Elizabeth Shinn

"On Sunday afternoon, June 19, 1927, Gertrude Ellsworth, Elizabeth Shinn and Jane Cobb left Niles for a two week's outing at the Berkeley Campfire Girls' camp, which is situated near Searsville Lake above Palo Alto.

"Some of the many sports enjoyed by the girls were:
swimming, rowing, hiking, baseball, archery and horseback riding. There were also classes including handicraft, campcraft, nature-craft, dramatics, cooking, first aid and basketry.

"Two teams made up of the girls in camp caused a great deal of competition. The way the teams won their points was in different contests, such as swimming meets, a field day, through their honor charts which were kept daily and individually and in a name contest having as its goal the ability to name everyone in camp.

"Seven councilors and a camp director mingled constantly with the girls and helped them to win their honors which were presented at Council Fire at the close of the two weeks.

"Through the close association of the girls in camp they all learned to locve and appreciate the ideal life of a Campfire girl."

Testing Times

ON a levee at a bend in the Mississippi a thousand men were building with sand-bags a second-line defense against rising waters which threatened hundreds of miles of fertile cropland. Over a telephone, housed in a wooden box nailed to a tree, an engineer was talking to headquarters—reporting on the progress of the work, asking for reinforcements and additional material, receiving Weather Bureau forecasts which would be vitally important to him in planning the strategy of this grim battle for lives and property.

The telephone had been put in service but a few minutes before, after a construction crew had worked from sunrise to sunset, often waist-deep in swamp water, to string fifteen miles of line to this isolated outpost.

Such is telephone service in an emergency—service in which telephone men and women do very much the same things they do every day of their lives, but do them under conditions that give vivid emphasis to the import of their efficiency, devotion, and fidelity to public interests.

In such crises, when even the most commonplace of calls may become a matter of life or death, the public realizes its day-by-day dependence upon the telephone and upon the men and women who make of it an instrumentality of human service.

For This Once Mandy Had to Compromise

Mandy was an incurable optimist and the embodiment of kindliness. She would never admit that anything was wrong with anyone, although sometimes facts pushed her hard. Her young mistress had many suitors, and the latest recruit to the ranks could boast as little in the way of good looks as was humanly possible.

"Grand looking chap, isn't he, Mandy?" queried Miss Marie's mischievous brother when the guest had departed.

Mandy teetered perilously between truth and charity. "C'ose he was," she answered presently with dignity. "Han'some gennulman—han'some gennulman." At that point honesty got the upper hand. "Ceptin'," she added conscientiously, "fo' his features."

Colors by Wireless

Pictures in three or more colors can now be transmitted by wireless and reproduced with delicate shadings. Engineers have been experimenting for a year on colored telephotos on the same principle as black and white photos. Separate transmission is necessary for each color.

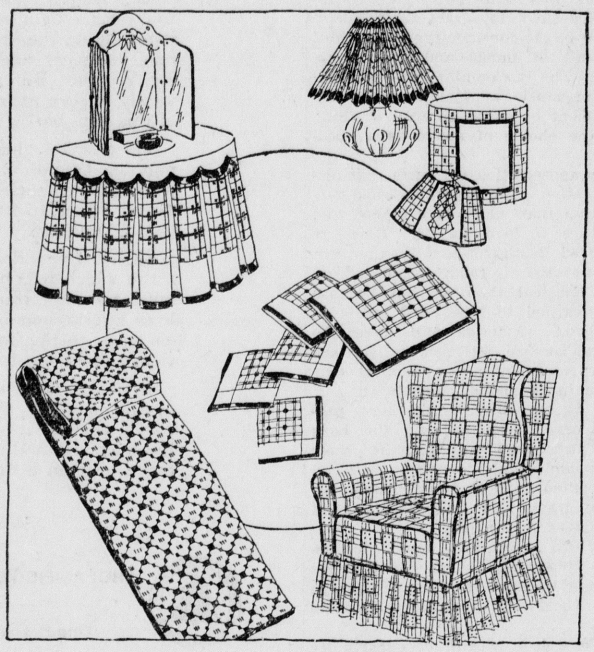
Pretty Things that are Made at Home

GINGHAM, most versatile of fabrics, has come into popular use for interiors as well as for the wardrobe. With the present peasant mode in interiors now sweeping the country, decorators are turning more and more to gingham. Some are even using it as a wall covering in place of paper with great success. It is shellacked and can be kept clean with soap and water.

From the dresser drape to the tablecloth and napkins there is scarcely a matter of fitting the chair. Some women pin paper to the chair and then cover a pattern for the gingham. For the chair shown, which is a fair-sized wing chair, it required nine yards of gingham.

From skull caps to brims of tremendous width—'tis the latest caprice of the millinery mode. Broad brims and short skirts, never!—so said some of our fashionists at some time or other in the past. In present-day modes, behold the theory disproved! Smart women of fashion are at this moment looking their smartest in short-jacketed, short-skirted tailleurs topped with plain-banded straw hats of enormous dimensions. That's the interesting part of these big-brimmed hats (some quite floppy)—they are not confined to dressy modes. Rather do they compete with entrancing so-thin-you-can-see-through-them picture types. For that matter many of the large tailor-banded black hats are themselves transparent, but these are not as frequent as are the very elegant milans, with their velvet bows and bands.



SOME USES FOR GINGHAM

Modishly banded, with either grosgrain or velvet ribbon, this is the regulation trim adopted by fashion for huge straw hats, such as the one pictured to the left in this group. If it isn't a milan which milady wears then it's a leghorn wide of brim or very likely one of the new paillassin straws. Leghorns which measure up to the mode's requirements as to width of brim are either au naturelle, or else dyed black or some lovely pastel shade. Black velvet ribbon bands are the rule for natural or black leghorns.

any interior decoration that lends itself to fabric that cannot be made from gingham. The dresser drape in the sketch may be made from any of the many beautiful colorful designs, and trimmed with plain gingham. The plains come in colors to match the predominating shade in the design. It will require about seven yards with three yards for trim.

The "lazy pad," as it is called, sketched just under the dresser, is for the beach, yachting, lawn or picnic, where one may like to take a siesta in the open. It is simply made from two strips of gingham of the width required. All ginghams come in 32-inch widths.

To make the tablecloth will require one yard and a quarter of the designed gingham and three-fourths of a yard of the plain for a five-inch border. The cloth will be about forty-one inches when finished. Each napkin requires one-fourth of a yard of designed material and an eighth of a yard of the plain.

The lamp shades are made from parchment with designed gingham pasted on with rubber cement. Rubber cement is better than glue, as it is not so apt to come through, and will permit the gingham to peel off easily in case of a mistake. The light shining through the parchment and gingham is beautifully softened and very effective. For a large lamp shade of about sixteen inches in depth it will require two and a quarter yards of gingham and a yard and a quarter of parchment. The strip of parchment and gingham when ready to plait is four and a half yards long.

The slip cover for the winged chair is a more difficult proposition. Still there are any number of women who make their own slip covers without the aid of an upholsterer. It is simply but if the leghorn be colorful, its tailored trim is either a perfect match or a perfect contrast. The same applies to the lovely large crin capelines, so favored with sheer frocks.

The leghorn hat first in this group maintains a tailored aspect, although it has been intricately worked with velvet. The hat below introduces a pastel-colored silk facing. At the top to the right in this collection of delectable summer millinery, is one of those sheer transparent affairs, which lends itself so consistently to the dressy midsummer costume. A tulle flange adds to the width and grace of the brim. JULIA BOTTOMLEY.

HATS OF THE DRESSY TYPE

TO CAN PEACHES AND APRICOTS AT HOME

Most Satisfactory Plan for Canning.

(Prepared by the United States Department of Agriculture.)

Peaches are among the most satisfactory fruits for canning at home. They should be canned as soon after picking as possible. Only clean, sound fruit should be used. The canning may be done by the water-bath method—that is, in a wash-boiler or any covered vessel sufficiently deep to hold all the jars completely immersed in water while standing on a rack or false bottom. The following directions for canning peaches are taken from Farmers' Bulletin 1471-F, "Canning Fruits and Vegetables at Home," which may be obtained free from the United States Deparement of Agriculture.

Before preparing the fruit make thin sirup, using 1 cup of sugar to each 3 cups of water. A richer sirup may be made if desired, if the peaches are not very sweet, using only 2 cups of water. Put in one cracked peach pit for each quart of sirup. Boil 5 minutes and strain.

Immerse the peaches in boiling water for about 1 minute, or until the skins will slip easily, cut the peaches into halves, and discard the pits. If any quantity of peaches are to be handled, it is better to use a lye solution for peeling them. The method for doing this is described in the bulletin on canning. Pack the peaches into jars as soon as they are peeled and cut into pieces, placing the halves in overlapping layers, concave surfaces downward. Fill up the containers with boiling sirup. Process quart and pint glass jars for 25 minutes in boiling water if the fruit is fairly firm and hard, or for 20 minntes if it is ripe and tender. No. 2 and No. 3 tin cans are processed 15 minutes.

Apricots are handled in the same way.

USING COTTON IN TAILORED STYLES

Easily Laundered at Home and Are Crisp and Fresh.

(Prepared by the United States Department of Agriculture.)

The trend toward simple tailored styles for street and business wear is being reflected in summer washable dresses. Various cotton fabrics are seen in offices or in the shopping districts during the warm months, and because of the appropriate weaves, patterns and colors available this season, these are giving excellent satisfaction. Cotton always has the advantage of being easily laundered at home so that one may have a number of fresh, crisp, inviting garments on hand all the time.

One of the best cotton materials for making up in tailored styles suitable for street wear is dotted swiss. It comes in many different colors including several that do not readily show soil, such as brown, navy blue, gray, or forest green, and also in many lighter shades or in combinations of color—a background of one color, with dots of another. The crisp texture of dotted swiss is excellent for rather severe designs, although so often this material is thought of only in connection with afternoon or party dresses.

Dotted Swiss in Tailored Effect.

Here is a trim street costume in navy blue dotted swiss with trimmings of white bias lawn tape. There are two collars, the upper one white and detachable so that it may be washed more often than the entire dress requires. The dress appears to be a two-piece costume, but in reality it is all in one, the joining being concealed by a dark blue belt matching the tie. There are three pleats on each side of the skirt, bound on the edges with white bias tape, which serves to keep them in place. The bottom of the blouse is finished with a scalloped line bound with the tape, and the cuffs on the short sleeves are trimmed in the same way. The tie is made interesting by having pearl buttons in graded sizes set on it, and these are matched by the pearl belt buckle. Many other trim designs could be developed in dotted swiss, and this style, as well as others, could be made up in numerous cotton materials appropriate for street wear. The new printed charmeuse, ginghams, printed zephyrs, lawns, and suitings are all pleasing and practical. All-over patterns on dark backgrounds are generally best to select when one must ride in public conveyances or handle dusty books or papers.

USE WHITE ICING FOR LAYER CAKE

Successful Way of Making Cooked Frosting.

Here's an entirely different and always successful way of making cooked frosting for layer cake. The outside of the icing will have a crisp, shiny crust and the inside will be moist and soft. The bureau or home economics furnishes the recipe, which can be modified for chocolate or caramel frosting. If directions are carefully followed there should never be a failure with this icing.

Put the sugar, water and unbeaten egg-white into the upper part of a double boiler. Have the water in the lower part boiling. Commence beating the mixture with an egg beater at once and beat constantly while it cooks for about 7 or 8 minutes. It should then appear just like ordinary boiled frosting and should be almost thick enough for spreading. Take it from the stove and continue to beat about 5 minutes or until it has thickened.

If the icing proves to be insufficiently cooked it may be placed in the double boiler and be recooked for a short time. Or if it is too stiff add a small quantity of water and cook again.

Chocolate Frosting — Melt 2½ squares of chocolate and pour into above mixture just before removing it from the stove. Beat thick and then spread.

Caramel Frosting.—Caramelize one half cupful of sugar, then add a few tablespoonfuls of boiling water. A thin dark sirup should result. Substitute about two tablespoonfuls of this sirup in place of two tablespoonfuls of water, or such amount as will produce the desired flavor; and continue as in vanilla frosting, above.

Food Materials Wasted Because of Preparation

It is more economical to serve small, though adequate portions, and permit second helpings to the hungry ones, than to heap up the plates, only to have uneaten food thrown away. Food should look appetizing when it comes to the table. It takes very little time and no extra expense to garnish a platter, cover up the hot vegetables to keep them warm, or remove skin, surplus fat and gristle from meat. Good food materials may be wasted because of poor preparation. Scorched food is an especially needless waste. Inexpensive materials can be made palatable by good seasoning.

GIRLHOOD TO MOTHERHOOD

Iowa Woman Found Lydia E. Pinkham's Vegetable Compound Always Helpful

Vinton, Iowa.—"When I was seventeen years old I had to stay at home from school. I finally had to quit school, I was so weak. I suffered for about two years before I took Lydia E. Pinkham's Vegetable Compound, then I picked up one of your books and read it. I began taking the medicine. Now I am a housekeeper with six children, and I have taken it before each one was born. I cannot tell you all the good I have received from it. When I am not as well as can be I take it. I have been doing this for over thirteen years and it always helps me. I read all of your little books I can get and I tell everyone I know what the Vegetable Compound does for me."—MRS. FRANK SELLERS, 510 7th Avenue, Vinton, Iowa.

Many girls in the fourth generation are learning through their own personal experiences the beneficial effects of Lydia E. Pinkham's Vegetable Compound. Mothers who took it when they were young are glad to recommend it to their daughters.

For over half a century, women have praised this reliable medicine.

Hat Gave Warning of Oscar's Temper

One of the eccentricities that made the late Oscar Hammerstein, the noted theatrical impresario, such a picturesque figure on Broadway is recounted by George Blumenthal in an article in Liberty "When you saw Oscar Hammerstein coming down the street wearing his funny silk hat, you knew he was in a good humor. But if he were wearing a slouch hat—look out!

"I recall that at the Manhattan opera house there was a little place beneath the stage which had never been finished," the writer tells. "This 'cave' would admit about six persons and was a great place to be when Hammerstein went on one of his many rampages. We employees called it the Cave of Refuge. Before Hammerstein arrived for the day, we generally had a lookout posted. He would come back and report something like this: 'It's all right—the boss is wearing his high hat.' Or: 'Watch out—he's got on that slouch hat!' The slouch hat meant the Cave of Refuge for us."

Suit We're Born With

To find out how many yards of skin it takes to cover a human body, Doctor Takahira, Japanese physician, had a special variety of thin strong paper which adheres closely to curved surfaces pasted over his nude form. This was dried, then removed, cut into flat pieces and measured. In this way Doctor Takahira discovered it took 16 square feet of skin to cover him, although he is only 5 feet 6 inches tall. . . . That is another thing we shan't have to worry about from now on.—Capper's Weekly.

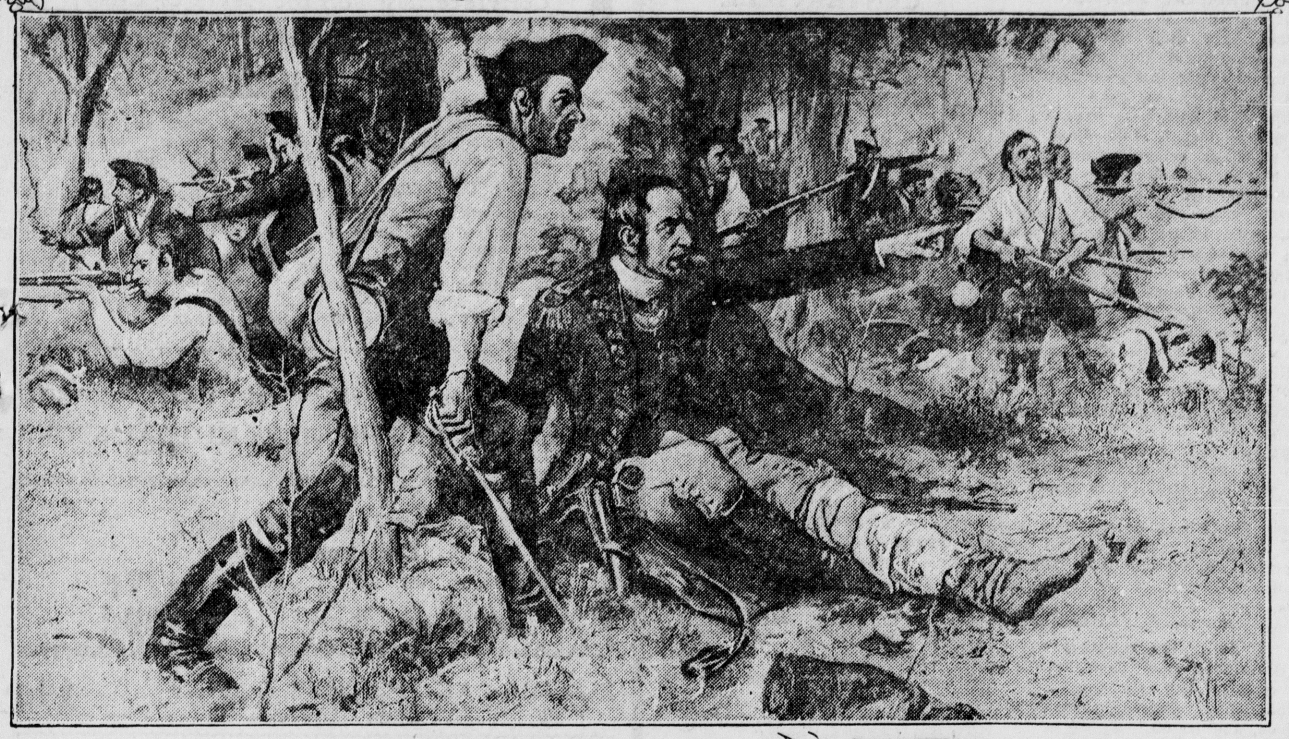
Oriskany and Blue Licks



GENERAL HERKIMER AT THE BATTLE of ORISKANY
Courtesy Utica Public Library

By ELMO SCOTT WATSON

ONE hundred and fifty years ago this summer there was fought on the frontier of New York one of the most hotly contested battles of the American Revolution. This was the battle of Oriskany on August 6, 1777, where a force of New York militia led by Gen. Nicholas Herkimer, marching to the relief of Ft. Schuyler, won a victory over a force of Tories and Indians, commanded by Sir John Johnson and the great Mohawk chief, Joseph Brant. Five years later out in the wilderness of Kentucky a similar battle was fought between an army of Kentucky frontiersmen, led by Cols. John Todd, Stephen Trigg and Daniel Boone, and a force of Canadians and Indians, commanded by Maj. William Caldwell, who had with him the renegades Alexander McKee, Mathew Elliott and Simon Girty. This was the battle of Blue Licks, often referred to as "The last battle of the Revolution," fought on August 19, 1782.

Although there is no direct connection between the two engagements, they exhibit a striking parallel of the circumstances which brought them about that is worthy of more than passing notice. In both cases the headstrong folly of subordinates overruled the cooler judgment of the commanders, thereby bringing upon themselves the disaster which could have been averted.

The battle of Oriskany was a part of the campaign which centered around Ft. Schuyler on the present site of Rome, N. Y., in 1777. The stirring events of that year are to be recalled this summer in a series of sesquicentennial celebrations which will be held at various places in the Mohawk valley. Chief among these will be the Oriskany celebration where the memory of the men who fought in this dramatic and bloody engagement will be honored by their descendants and hundreds of visitors from all parts of the country. The events leading up to the battle of Oriskany were these: As a part of the British plan to score a decisive success during the summer of 1777 and to crush the Revolution, Col. Barry St. Leger had been sent to sweep through the Mohawk valley to Albany where he was to join the army of General Burgoyne who was coming down from the north. But there was one obstacle to St. Leger's success. This was Ft. Schuyler, held by a force of Continentals under the command of Col. Peter Gansevoort and Col. Marinus Willett. On August 2, St. Leger appeared before Ft. Schuyler with a force of some 1,700 British regulars, Hessians and Tories—led by Sir John Johnson, John Butler and his son, the notorious Walter Butler, and Iroquois Indians. Colonel Gansevoort had appealed to the Committee of Safety in Tryon county for help and the chairman of this committee, Nicholas Herkimer—"Old Honikol Herkimer" was the affectionate nickname for him—(who had been appointed a brigadier general the previous year) immediately raised the militia of Tryon county and set out for the relief of Ft. Schuyler. Herkimer's army, a force of about eight hundred men, was divided into four regiments. The first was led by Col. Ebenezer Cox and was from the district of Canajoharie. The second from Palatine was commanded by Col. Jacob Klock, the third from Mohawk was under Col. Frederick Visscher, and the fourth, from German Flats and Kingsland, was commanded by Col. Peter Bellinger. This force assembled at Ft. Dayton near the mouth of West Canada creek, and on August 4 started out, crossed the Mohawk near the present site of the city of Utica and reached Whitestown on August 5.

At this point Herkimer sent an express to Colonel Gansevoort to arrange for co-operation in moving against the enemy. Gansevoort was to fire three cannon shots as a signal that a force from the fort was ready to make a sortie, whereupon Herkimer was to advance with his army. He was then about eight miles from Ft. Schuyler and it would be easy to hear the report of the big guns at that distance. But his messengers were delayed in getting through the enemy to the fort and Herkimer's men waited impatiently for the sound of the cannon. Finally, chafing at the delay, they demanded to be led against the enemy. Herkimer steadfastly refused. Then some of his officers, notably Colonels Cox and Paris, began to reproach him and even went so far as to accuse him of being a coward and a Tory. But the wise old commander resisted their urgings until they became unbearable. Finally, stung to madness by their unjust accusations, he gave the command to advance.

It was more of a disorderly mob than an army that streamed out of the encampment. At Oriskany creek the road led across a narrow causeway of logs over a marsh with thick woods on either side. St. Leger had sent a large body of Tories, many of them neighbors of Herkimer's men in Tryon county, the noted "Johnson's Greens," under Major Watts, accompanied by a body of Mohawk Indians led by the famous Joseph Brant, who prepared the ambush for Herkimer's men. Just as the head of the column marched onto the causeway the Indians impetuously opened fire. Herkimer's rear guard retreated almost immediately, but the rest stood their ground and returned the enemy's fire. They at once sought shelter behind trees and immediately there took place one of the fiercest battles in American history. For the most part it was a hand-to-hand fight. Colonels Cox and Paris, whose rashness had precipitated the fight, were among the first to be killed. Herkimer was disabled early in the fight by a bullet which shattered his knee. His officers urged him to retire to safety, but his reply has become a historic byword in the Mohawk valley—"I will face the enemy."

DANIEL BOONE From Bust by Albin Polasek

NICHOLAS HERKIMER

During the battle, Herkimer's messengers reached Gansevoort, who had been wondering what the distant firing meant and who fired the three signal cannon. Herkimer's men heard them, but they could not advance now. They were fighting for their lives. So great was the slaughter in both armies that the Indians finally raised the cry of retreat—"Oonah, Oonah!" and left the field. The Tories, seeing this and being alarmed at the sound of the firing made during the sortie from the fort which had been led by Col. Marinus Willett, also retreated. Herkimer and his men held the field on which they had won their dearly bought victory. The losses inflicted upon the enemy and Willett's sortie which had fallen upon St. Leger's camp stampeded a portion of the British force and captured a great store of supplies, resulted in St. Leger's giving up the siege of Ft. Schuyler. So victory came out of defeat after all, for Ft. Schuyler was saved and the threat of St. Leger's invasion of the Mohawk valley collapsed. Herkimer died a few days after the battle.

Five years later occurred the other battle in which the foolhardiness of headstrong men brought about another disaster equal to that of Oriskany. On August 16, 1782, a mounted messenger dashed up to Boone's Station, a small frontier fort which this famous pioneer had built across the Kentucky river a short distance from Boonesbourough—with the news that Bryan's Station, an important point further west, about five miles from the present city of Lexington, had been attacked by an overwhelming force of Indians and Canadians. The men of Boone's Station immediately galloped to the aid of their brethren, and the next day found Boone, who happened to be at Boonesbourough at the time, on the way to Bryan's Station, with all the men of the vicinity that he could collect. When they arrived, they found that the enemy had already retreated, but since, by the evening of August 17, the Kentuckians assembled at Bryan's Station numbered more than 180, and as many more under Col. Benjamin Logan were expected hourly, they determined to observe the principle of border warfare—that no savage foray should go unpunished. So, without waiting for Logan, they decided to pursue the enemy at once, even though they realized that the enemy, composed of fierce Wyandottes and accompanied by the renegades McKee, Elliott, and the infamous Simon Girty, greatly outnumbered them. Early the next morning the party, commanded by Cols. Todd, Trigg and Boone, set forth. They found that the enemy had left a plain trail, but heedless of this indication that the allies invited pursuit, the Kentuckians dashed on rapidly. On the morning of August 18 they came to the Licking river at a place called Blue Licks. A few Indians were seen on the ridges across the river. Boone was certain the Indians were lying in ambush and advised his men to select a strong position on their side of the river and wait there until Logan and his men arrived.

But this wise counsel was disregarded by the impatient Kentuckians who were anxious to strike a blow at the enemy who had besieged their stations. Boone then proposed that a party be detached, march up the river and fall upon the rear of the enemy at a prearranged signal, while the main attack was delivered in front. While the proposition was being discussed, a decision was forced by a Major McGary, who had supported Boone in the proposal to await the arrival of Logan and had been taunted with cowardice by some of his fellows for doing so. McGary suddenly broke up the council by spurring his horse to the ford and dashing across it, shouting "Let all who are not cowards follow me!"

It was just the sort of an appeal which would influence such rashly courageous men as most of these Kentuckians were. They streamed across the river in disorderly fashion and there was nothing for Boone, Todd and Trigg to do but to follow, and to try to restore some order in the straggling mob. They crossed the river safely and advanced up a buffalo trail to the top of the ridge beyond. By this time some semblance of order had been restored, with McGary leading an advance party of twenty-five. As they approached the top of the ridge a rifle shot rang out as a signal for the crashing volley which then followed. Twenty-three of McGary's twenty-five men went down at this first fire. The headstrong McGary who had precipitated the fight was one of the two who escaped. After this first volley, the Canadians showed themselves on the ridge and from the ravine on either flank, the Indians opened a deadly fire. The Kentuckians stood their ground and returned the fire. Instantly the Wyandottes, always noted as reckless and desperate fighters, came bursting through the smoke with poised tomahawks. There was a short hand-to-hand conflict until the Kentuckians, greatly outnumbered, almost surrounded and in imminent danger of being slaughtered where they stood, broke and fled back toward the river. Nearly every officer of rank was killed. Boone escaped across the river.

The Kentuckians, hotly pursued, streamed back across the river. There Major Netherland rallied his men and offered resistance, ending the pursuit and preventing a massacre.

Of a force of approximately one hundred eighty men, sixty-seven had been killed outright or were murdered as they lay wounded on the field of battle, and seven had been captured, four of whom died at the torture stake. Nearly every man who escaped was wounded in some way. Half-way back to Bryan's Station, the survivors met Colonel Logan with 400 men, coming to their support. How bitter must have been their regret when they realized how different the result might have been if they had heeded Boone's advice and awaited Logan's coming, and had not been swept into action by McGary's rash appeal. Blue Licks was perhaps the greatest defeat ever suffered by the pioneers of the Blue Grass state, but it was also a high-water mark in her history. For the Indians came no more to Kentucky and Blue Licks marked the end of the frontier period.

Oriskany and Blue Licks—two names which afford a striking illustration of the injury which a body of undisciplined men may do to themselves and those dependant upon them. But in the memory of the desperate valor of the men who fought these battles, History forgives them their indiscretion and in these sesquicentennial years remembers only a nation's gratitude to the men who helped in the winning of the West.

"You're a free thinker, eh?"

"I guess that's what you'd call it. Nobody pays me for it."

Burglars Around

"That fellow steals a lot of bases."

"Yeh, maybe we'd better lock up the plate."

CHILDREN CRY FOR

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of Chas. H. Fletcher. Absolutely Harmless - No Opiates. Physicians everywhere recommend it.

A wise man knows the value of silence when a child begins to cross-examine him.

A successful man forms a plan and sticks to it, working like a gimlet to a point.

Here's Speedy Relief for Tender, Aching, Swollen Feet

Your Druggist Says Emerald Oil Must Give Complete Satisfaction *or Money Cheerfully Refunded.*

Your feet may be so swollen and inflamed that you think you can't go another step. Your shoes may feel as if they are cutting right into the flesh. You feel sick all over with the pain and torture and pray for quick relief. What's to be done?

Two or three applications of Moone's Emerald Oil and in fifteen minutes the pain and soreness disappears. A few more applications at regular intervals and the swelling reduces.

And as for Soft Corns and Callouses a few applications each night at bed time and they just seem to shrivel right up and scale off.

No matter how discouraged you have been with powders, footbaths or other applications, if you have not tried Emerald Oil then you have something to learn.

It's a wonderful formula—this combination of essential oils with camphor and other antiseptics so marvelous that thousands of bottles are sold annually for reducing varicose or swollen veins.

Every good druggist guarantees the first bottle of Moone's Emerald Oil. It must end your foot troubles or money back.

PEMENTEL BROTHERS,

Blue a Sacred Color

Blue has been considered favorably by almost all kinds of people. Blue was worn by the Greek gods, especially by Juno, who ruled the heavens; the Jewish priests wore blue to signify contemplation; the Persian associated it with air and vastness; for the Mongol it means authority and power; it is believed by some that angels wear blue to give an impression of faith and fidelity, and it is said that the "Virgin Mary" wore it as a sign of modesty; in heraldry it stood for chastity, loyalty, fidelity and good reputation. Early Christian artists used blue as a symbol of divine eternity and human mortality, and so it came to be considered a mortuary color and was utilized as a covering for coffins.

TOWNSHIP BRIEFS

PERSONAL MENTION

Mr. and Mrs. W. D. Patterson of Newark have their son Donald at home with them this summer, he having graduated this year from Harvard.

Mrs. Abel Fisher is expected to be up the last of this week after five week's of being confined to her bed because of injuries in an automobile accident.

Little Miss Estelle Mae Martenstein visited in San Andres last week with the Robert Tysons and Miss Louise Tyson.

Miss Lucy Shinn and her guest, Miss Helen Hofstetter, students at the summer school at Berkeley spent last week-end at Miss Shinn's home in Niles.

Mrs. Harry Hunt and children from Salinas are spending the week with Mr. and Mrs. H. R. Hunt of Niles.

Mr. and Mrs. Richard Jeleff and baby are visiting Mrs Jeleff's parents, Mr .and Mrs. Philip Moore of Niles.

Miss Fay Thane of Berkeley and Miss Genevieve Crothwaite of San Francisco are visiting Miss Thane's grandmother, Mrs. J. E. Thane of Niles.

TOWNSHIP WOMEN

(Continued from page Five)

see some of the city—took a look at the Imperial Palance, some of the shrines, and so on.

"Tokyo and Koko also still show evidences of the great earthquake on all sides but it is surprising how much the cities have already been rebuilt, especially Tokyo, with modern reinforced concrete buildings going up on all sides. Things are just as up-to-date in Tokyo as they are in New York. Japan may have been way behind the Occidental countries 75 years ago, but not now. They're just about caught up. They not only have the advantages of all western inventions, etc, but also cheap labor and things are going ahead apace. You should see the amount of shipping in Japanese ports, and the factories in such manufacturing centers as Osaka. It is, though, a country of contrasts; side by side with a fine automobile you will see a jinrikisha and standing in the shadow of a modern office building you may see an ancient Budchist temple still surrounded in the heart of the city with a few of its sacred trees.

"Japan surely appears to be overpopulated, but the people are the most courteous and industrious I have ever sen. All this talk of animosity toward the United States is rank propaganda, I would say, and as for a war, I think the Japs are wise enough to see that they can spend the price of a war to better advantage on mercantile enterprises.

"From Osaka, which is the center of the textile industry, I went up to Kyoto and stayed a day and a night. Kyoto is a large city, fairly modern in some districts. It is an art center and for hundreds of years the capital of Japan and also a sort of religious center which it still seems to be. It boasted two palaces and innumerable shrines and temples of which I saw a goodly number."

* * * *

"Hong Kong is a fine city and has a beautiful harbor, especially if viewed from the peak, a high hill just behind the city, on which are many fine residences. There is very little Chinese aspect about the place, though."

* * * *

"Nagasaki was a very interesting place. It is the oldest city in Japan. It has a mild, very pleasant climate at this time of the year. Even in Nagasaki, though, it is not yet 'cherry blossom time' (March 19), but it ought to be in a couple of weeks as I saw a few blossoms starting to appear here and there.

"I took a rikasha ride around the city and went through two or three of their temples and shrines, one an ancient Chinese Buddhist temple built by some invading Chinese in past times. At present Nagasaki is a place of some 200,000 people and in the center of coal, iron and copper mining district. Near Nagasaki there is quite a little manufacturing and ship-building, but very little in the city itself.

"I'm sending some Japanese slippers for Elizabeth. To wear them though, I guess she'll have to have some socks of the kind they wear in Japan with the big toe separate from the others or else go barefoot as a great many Japs do."

MRS. ROLAND TO DIRECT SUNDAY SCHOOL HOUR

Last week a wrong impression regarding the vacation Sunday School was given in these columns when it was tsated that Miss Sanford would conduct the hour's program each week, the facts in the case being that the teachers are taking "turns" in this capacity. However, we don't intend to take back a word of what was written, for upon investigation we have learned that Miss Sanford did carry on this work last summer and Mrs. J. E. Townsend the summer before and whatever was said last week is repeated only it is to apply to several instead of one.

Last Sunday Mrs. Townsend had charge and 28 children enjoyed the story she told and the memory drills and music. Those present were asked to memorize the 100th Psalm for next Sunday and all thoe who have accomplished this will be given some evidence of credit when the regular sessions begin in the fall.

Next Sunday's program will be under the direction of Mrs. Herbert C. Roland. All children of the community are invited.

CENTERVILLE

The Plummer House has completely turned and is nearing the back road. By the way—what's the name of that street? It is balked by two parties and preventing a thoroughfare from Newark road to Hansens lumber yard. Also a quicker way to Booth's cannery. But the time will come when it will go through. Then with the new Hansen lot we may really grow.

Mrs. M. Bodutch is visiting in Oregon and will be gone about a month.

Mr. and Mrs. G. Mathiesen and family, also the Gronleys, have gone to Oregon on a camping trip.

The last of series of "Sweet 16" was given by Mr. T. Oakes on Thursday. Mrs. M. Fitzgerald carried off the prize of slams; Miss M. Noris, first prize and Mrs. George Mathiesen, consolation.

Both of our dentists are away on their vacation. This may be the height of professional etiquette—but its mighty hard on the patient who is in a hurry with a lively tooth!

We have three of our community who are very ill—Judge B. Mickle is very low. His daughter from Wyoming has arrived. Betty Heakin who has long made her home with Mrs. C. Emerson, has had two nurses for several days, but seems to be recovering. Mrs. Christenson is quite ill but is improving.

The John Fittings have been in Capitola for a week. They returned Sunday night.

CANNERIES OPEN

The Schuckl cannery in Niles and the Booth cannery in Centerville are open for the apricot season. A handicap is felt since this crop is running late and the peaches will be matured before the cots are completed.

PERSONAL MENTION

Miss Evelyn Mary Shattock of Fairfield is the guest of Mr. and Mrs. Roland of Niles.

The Roland twins, Misses Mildred and Myrtle and Miss S. Reid of Alameda, are motoring to Yosemite Valley in a Chevrolet coupe. They plan on staying a couple of weeks.

Mrs. William Jamieson and daughter, Miss Penelope, of Oakland, and son and grandsons Bill and Billy Jamieson of Long Beach, Master Leonard Dart and Mr. Ed. Tennis of Oakland were the house guests of Roadmaster H. C. Roland and family of Niles over the week-end.

Mr. and Mrs. Robert Bonner and son of San Francisco were visitors at the Belvoir hotel in Niles this past week.

Mr. and Mrs. Marston Dassel of Niles were recent guests of Mr. and Mrs. Mathiesen of San Leandro.

Mrs. Kate Robinson of Los Angeles is visiting her mother, Mrs. Melvina Chaix and her sister, Mrs. Creed Dominici of Niles.

Mr. and Mrs. O. E. Walpert and Mr. and Mrs. Fred Track of Niles have returned from a visit to Pine Crest.

Mrs. , B. Barnard of Niles has had as her guest recently her son, Dr. Leonard Barnard of San Francisco.

Mr. and Mrs. Lester Duffey and Mr. and Mrs. Robert Blacow of Niles were recent visitors at Paradise Park in the Santa Cruz mountains.

Mrs. J. A. Zwissig is spending her vacation in Santa Ana at the home of her parents. Her husband will join her later.

Lloyd Fournier and Carl Christenson are spending their vacation in the Yosemite Valley.

Norman Francis Rogers had his tonsils removed at the Children's Hospital in San Francisco by Dr. Deane, this week.

Mrs. May Geib, one of the popular salesladies at the Mutual Store, is spending a few days at Yosemite this week.

Mrs. F. M. Hudson is entertaining Mrs. Barbara Button from Burlingame and Mrs. Hudson Hatch from Auburn.

Mr. and Mrs. A. A. Hatch have returned from a two week's visit in Los Angeles. They were accompanied home by their daughter, Mrs. R. B. Clapp of Alhambra, who will visit in Niles a few days before going on to the Giant oFrest.

We know of some men around Washington township who spend as much time trying to keep their hair from coming out as their wives spend in trying to keep the wrinkles from showing.

MUTUAL

Consistently sell the Best For Less

"Ask the Kiddies"

Skinnay and his gang and all the other boys and girls know where to get their ice cream cones. Ask them and they will tell you "The Mutual Stores give the biggest double-decker cones in Niles for a nickel!"

That nickel's worth is doubly big in quality too. Mutual Ice Cream is smoother, tastier and richer than ever and two scoops of it on a crispy cake cone is a wonderful treat for any youngster or grownup.

During the hot summer months Mutual Ice Cream cones are especially refreshing and nutritious. Hundreds of mothers buy them for the kiddies between meals, giving them that additional nourishment that every growing child needs.
